

Genetics For Generations

At Koester Red Angus, we focus on optimums, not maximums, to produce cattle that are balanced in all traits. We strive to develop efficient, maternal cattle that combine performance, structural soundness and phenotype from the moment their progeny hit the ground until they hang on the rail.

By blending trait-leading genetics with proven outcross lines, we enhance economic traits to keep us all in the beef business for this generation and generations to come.

March 12, 2010

At the Ranch • Sidney, MT

140 Bulls • 65 Heifers

LSF High Yield 8088U

We're excited about our new herdsire and look forward to his progeny hitting the ground next fall. Co-owned with Kuhn's Red Angus. Leased to Accelerated Genetics.

Shaye and her heifer, Koester Major Sugar 736, stood reserve overall at the Kidder County Fair. Watch for her bull calf in 2011's sale.

Kacey helped weigh and tag her bull calf, Koester Cinch 801, out of her first 4-H heifer. This calving-ease Chateau son sells in March!
